Tema pentru acasa

Problema 1

```
import java.util.Scanner;
public class Problema_1 {
    public static void main(String[]Args) {
        Scanner sc=new Scanner (System.in);
        int n=sc.nextInt();
        int i=1;
        do {
            int p=2*i;
            System.out.println(p+" ");
            i++;
        } while (i<=n);
        sc.close();
    }
}
```

Problema 2

```
import java.util.Scanner;
public class Problema_2 {
    public static void main(String[]Args) {
        Scanner sc=new Scanner(System.in);
        int n=sc.nextInt();
        int i=1; double sum=0;
        do {
            double p=Math.pow(i, 2);
            sum=sum+p;
            i++;
        } while (i<=n);
        System.out.println(sum);
        sc.close();
    }
}
```

Problema 3

```
public class Problema_3 {
    public static void main(String[]Args) {
        int i=1;
        do {
            int j=1;
            do {
                System.out.printf("%5d", j);
                j++;
            } while (j<=1);
            System.out.println();
            i++;
        } while (i<=5);
    }
}
```
